### Exploration Plans for Mexico

Auramex Resource Corp. (the "Company") announces that it will conduct a 1,000 metre diamond drill program at its Magenta property near Culiacan, Sinaloa, Mexico. Eight holes are planned at El Escobal to verify previous results and to evaluate gold values on strike to the northwest. A capped 314 metre hole at the copper/molybdenum/gold porphyry will be re-entered to test for mineralization at greater depth. Drilling is expected to start in early February.

The Company has reviewed a report on Mina Culiacan (El Fierro), obtained from the Mines Department Archives in Mexico, dated May 1974, authored by D.L. Chrisinger and K.F. Clark of the University of Iowa. This report refers to mineralization in platinum and nickel found at El Fierro. The Company plans to prospect and map the El Fierro area to validate this report.

The technical information in this news release has been reviewed and verified by David St. Clair Dunn, P.Geo., a qualified person under National Instrument 43-101.

For further information concerning this announcement, please contact Heather Conley, President and CEO, at (604) 682-5123. For general information on Auramex, please contact Robert A. Young and Associates at 1-877-626-2121 or locally 604-682-5123, and/or refer to the Company's website, [www.auramex.com](http://www.auramex.com)
