FOR IMMEDIATE RELEASE (TSX V Symbol: AUX) March 3, 2017

AURAMEX DEMONSTRATES FUSION OF SYNTHETIC APERTURE RADAR WITH OTHER EXPLORATION DATA AT THE PDAC CONVENTION IN TORONTO

Dr. Paul Metcalfe, VP Exploration, will be presenting at Auracle Geospatial Science Inc.'s booth at the Prospectors and Developers Association of Canada Conference held in Toronto next week. Auramex has collaborated with Auracle in applying their proprietary technology and methodology of Synthetic Aperture Radar data interpretation and fusing it with Auramex' existing geological (outcrop) and airborne geophysical data. The results of this collaboration have greatly contributed to Auramex' understanding of the geology and mineral potential of their Golden Triangle properties.

From Sunday to Tuesday, March 5th to 7th, inclusive, Dr. Metcalfe will be present at Auracle Geospatial Science's display booth #951South. Delegates are invited to stop by and learn about this emerging, cutting-edge exploration.

About Auramex Resource Corp. – www.auramex.com

Auramex Resource Corp. is a junior mining exploration company with projects in British Columbia and in Sinaloa State, Mexico. In B.C., the Company holds approximately 20,000 hectares near Stewart, in the Golden Triangle.
