Auramex Resource Corp. is a gold-silver explorer that has consolidated a commanding land position in one of the most richly mineralized regions in the world. We are committed to creating shareholder value by applying our geological expertise in the quest for large-scale discoveries.

Auramex is focused on the Stewart Camp, at the south of the Golden Triangle, an area that has been overlooked by modern explorers after several big discoveries attracted attention further north. Auramex spent a decade consolidating a large land position and is conducting some of the first comprehensive exploration in this part of the Golden Triangle.

Commanding Land Position

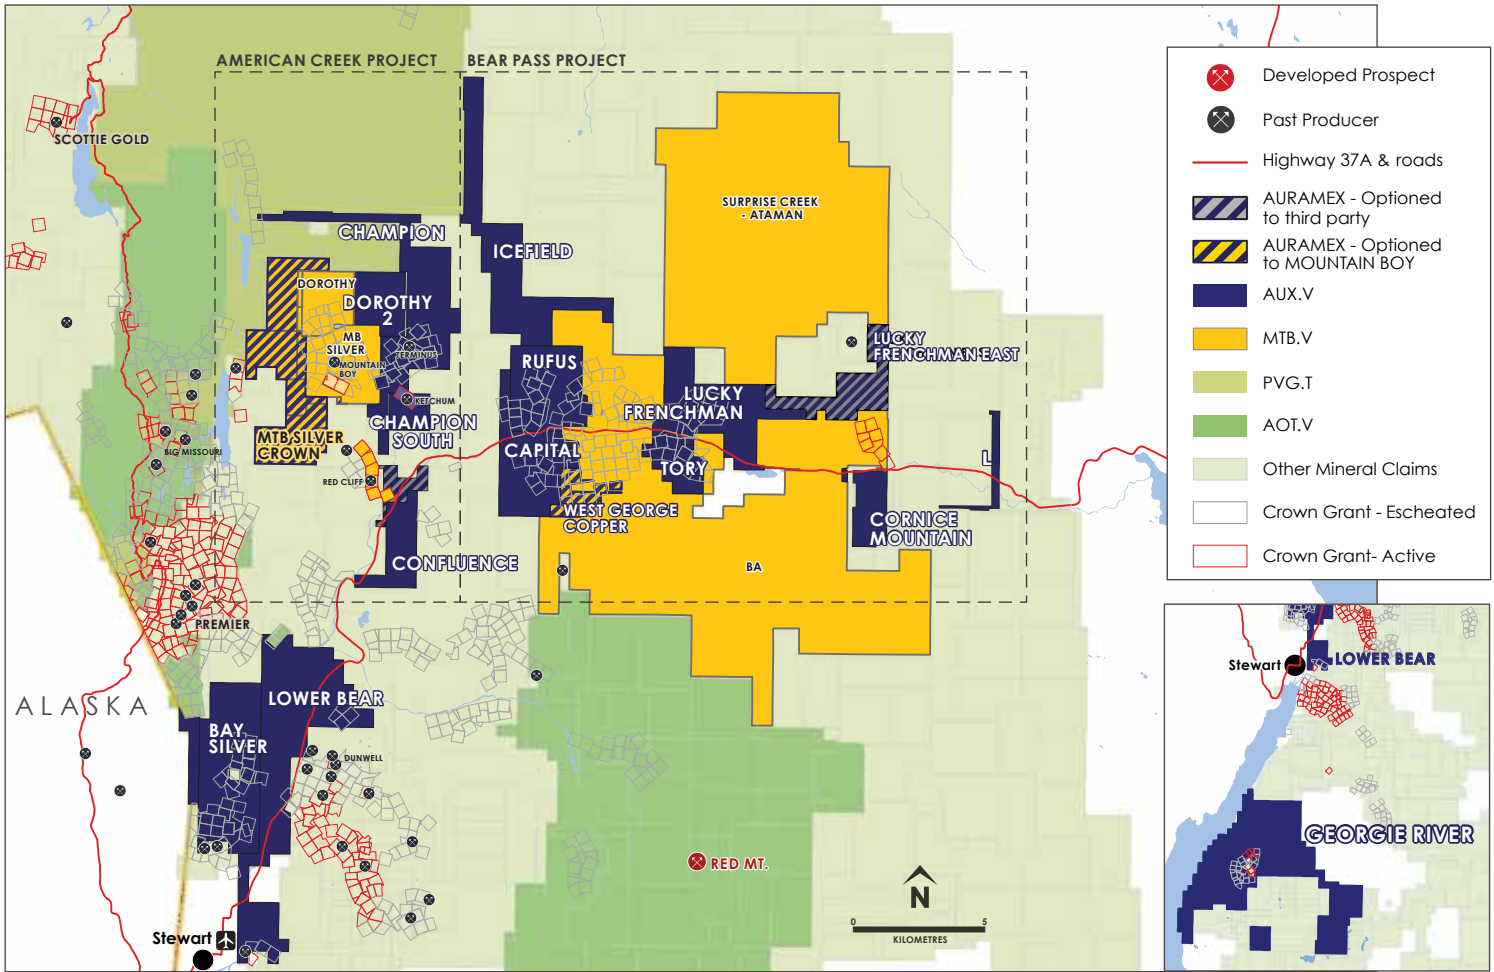

Wealth of Data

Technical Expertise

Determined to Discover

DISCLAIMER: This fact sheet contains forward-looking statements and forward-looking information (collectively, "forward-looking statements") within the meaning of applicable Canadian and US securities legislation. All statements, other than statements of historical fact, included herein are forward-looking statements. Information concerning mineral resource estimates also may be deemed to be forward-looking statements. Although Auramex Resource Corp. (AUX) believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. The company cautions investors that any forward-looking statements by AUX are not guarantees of future results or performance, and that actual results may differ materially from those in forward looking statements as a result of various factors. All of AUX Canadian public disclosure filings may be accessed via www.sedar.com and readers are urged to review these materials, including the technical reports filed with respect to the company respective mineral properties. The technical information provided in this fact sheet for AUX was reviewed and approved by Dr. Paul Metcalfe, P. Geo., the Company's VP of Exploration, the Qualified Persons (QP) for the purposes of Canadian National Instrument 43-101.

GEORGIE RIVER PROJECT

- High-grade gold producer in the 1920s and 1930s.
- Located on tidewater, 18 km south of Stewart.
- Work in 1970s to 2010 focused on the old mine.
- Related to Texas Creek Plutonic Suite (driver for most metal deposits in the Golden Triangle).
- Target: Intrusion related precious metal (Brucejack-style) deposit.
- Opportunity for scale:
 - Geophysical target in excess of 1 sq km.
 - Over 1 km of vertical relief hosting a large hydrothermal system.
- Drill permitting is underway.

BEAR PASS / AMERICAN CREEK

- Projects hosts multiple commodity targets (gold, silver, lead, zinc, copper) with district-scale potential.
- Presence of metalliferous Texas Creek intrusions in the Bear Pass area along with numerous gold-silver-base metal showings and occurrences.
- With two mines in the district now producing, and 2 more in development, this project is ideally located, spanning 15 km in the heart of the Bear Pass Valley with Hwy 37A running through the centre of the Project area.
- 2018 program brought together decades of exploration results and followed up with ground truthing.

LOWER BEAR PROJECT

- Highly prospective property in the area of the Portland Canal shear zone, immediately north of Stewart.
- Located between the historic, past producing mines of Dunwell and Silbak-Premier.
- Features the metalliferous Texas Creek Plutonic Suite and historic production.
- Multiple targets defined by geophysical anomalies, geology and gold-silver values at surface.
