About Auramex

Auramex is exploring a large and highly prospective property portfolio in the Stewart Camp, at the south end of the Golden Triangle in British Columbia. Auramex has 200 square kilometers of mineral rights, located north, east and south of Stewart, a deep-water port.

The Golden Triangle is beginning to be recognized as one of the most highly mineralized geological settings with excellent exploration potential for future discoveries. The Golden Triangle region has matured dramatically over the past few years, with two mines now in production, road access greatly improved, and a quantum leap in terms of geological understanding of the processes that created some of the largest, and highest-grade metal deposits on the planet.
